

HOW OUR PROJECTS MEET THE UNITED NATIONS SUSTAINABLE DEVELOPMENT GOALS

NO POVERTY

We build sustainable livelihoods by creating 'green' job and trade opportunities for local communities.

ZERO HUNGER

We contribute to food security by establishing and supporting small-scale and community-run eco-organic farming.

GOOD HEALTH & WELL-BEING

We advance the health of communities by eliminating pesticide use in farming and providing resources for proper hygiene.

QUALITY EDUCATION

We invest in education by supporting school infrastructure and teacher housing, student and teacher sponsorships, and career development.

GENDER EQUALITY

We ensure all community members are empowered through equal opportunities for jobs, training and support programs.

CLEAN WATER & SANITATION

We support farming without pesticides, disposing of waste without burning, and ensuring hygienic workspaces.

DECENT WORK & ECONOMIC GROWTH

We contribute to job longevity and career growth by ensuring communities trade eco-friendly products within a safe and open workplace.

INDUSTRY, INNOVATION & INFRASTRUCTURE

We work with nature to create safe and eco-friendly structures using our sandbag building technique.

SUSTAINABLE CITIES & COMMUNITIES

We invest in renewable energy and partner with local government to minimise our operational minimal carbon footprint on the community and environment.

RESPONSIBLE CONSUMPTION & PRODUCTION

We produce food sustainably in a way that works with nature's own cycles and defense mechanisms, and we recycle or upcycle to ensure circular production.

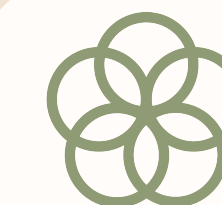

CLIMATE ACTION

We minimise our climate change impact by using renewable energy and working on carbon-neutral or -negative projects.

LIFE ON LAND

We design projects that support ecosystem health and biodiversity, taking natural habitats, lifecycles and food chains into account.

PARTNERSHIPS FOR THE GOALS

We work with community leaders, local government and international organisations to benefit from knowledge sharing and best practice opportunities.
